

Cultivation Systems From Discovery to Production

Engineering for Life

Special Projects | Customized Solutions

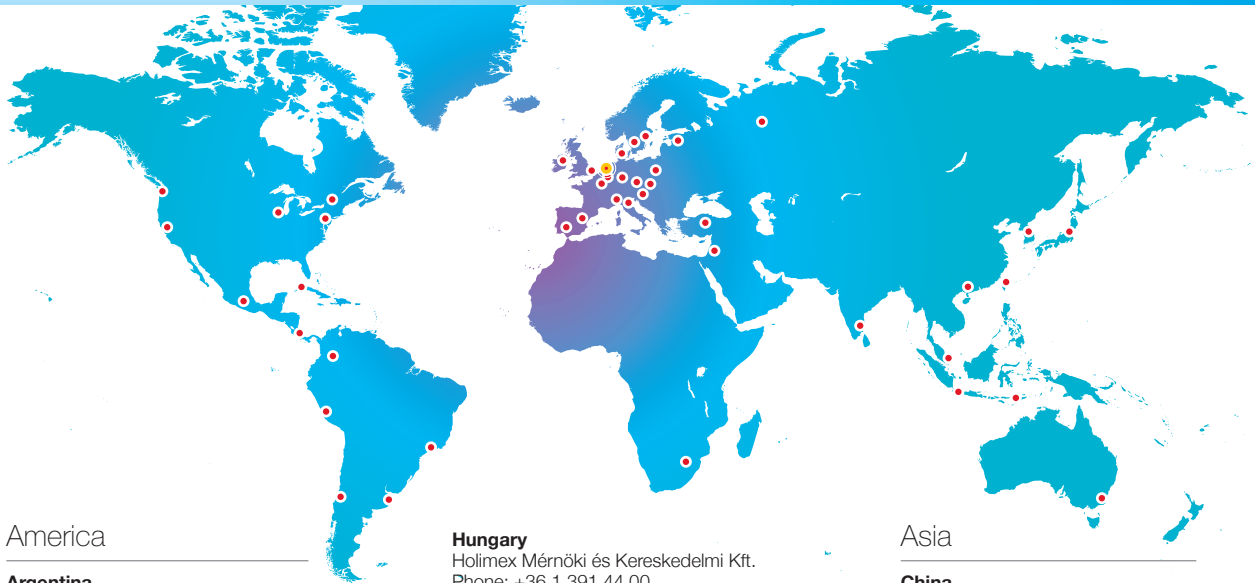

Bioreactors play a key role in the life science industry as an essential tool for, for example, the large-scale production of life-saving vaccines and first-rate medicines. The processing steps leading to these products can be complex, requiring tailor-made systems. This is where Applikon Biotechnology steps in. We provide the industry with solutions – both for development of new products and for the expansion of production capacity. These projects can range from very special mini bioreactors to a complete line of cGMP production systems ranging up to several thousand liters volume systems.

1500 Liter Bioreactor with i-Control

With over 30 years of experience we can design any system to suit your needs. Using modern design technologies, we will guide you through the process - from initial idea to final product. With advanced communication tools, verification tests and full documentation we ease all processes - making a product exceeds your expectations.

With our state-of-the-art facilities we are capable of manufacturing your perfect bioreactor system, no matter how complex. Our ISO 9001 certificate underlines the high quality level of our work and accompanying documentation. Our worldwide distribution network is there to guarantee the best after sales support and to make sure your systems stay in optimal working condition.
